

Human Cryopreserved Hepatocytes

Lot number: HUM4226A

Date (D/M/Y): 05/07/2017

Cryo Characterization Report (CCR)

Lot Overview		
Qualification	Catalog Number	Manufacture Date (D/M/Y)
Cryopreserved human hepatocytes, General Plateable	HUCPG	15-03-2017

Storage Conditions: <-150°C

Donor Demographics								
Sex	Race	Age	BMI	Tobacco Use	Heavy Alcohol Use	Drug Use	Serological Data	Cause of Death
Male	Caucasian	5 yrs	12.5	No	No	No	Negative	Natural Causes/Seizure Hydrocephalus and seizure disorder along with developmental delay

Additional donor demographic information, including relevant medical and medication history, is available upon request

Post-thaw Viability and Cell Quality Assessment			
Thawing Medium Used	Optimal Centrifuge Conditions	% Viability (post-thaw)	Viable cell yield per vial
MCHT50	100 g x 8 minutes	75.8	5.2 x 10 ⁶

HUM4226A, 24hrs, 10X

HUM4226A, 96hrs, 20X

Media products used for characterization:

MCHT50 - Cryopreserved human hepatocyte thawing medium, 50mL

MCHT50P - Cryopreserved pooled human hepatocyte thawing medium, 50mL
